105min - English To move between items, use your keyboard's up or down arrows. May 18, 2025May 14, 2025 John Hansen Books Sleuthing Sunday (Book and movie reviews): Hammetts experiment with blending crime and romance is worth reading, but the film doesnt rise above a curiosity. Writer-director Kevin Smith is a funnyman and as of 2011s
Red State also a horror filmmaker. With 2014s Tusk the first of a loose True North trilogy that includes Yoga Hosers (2016) and a TBD capper he combines those two passions. Tusk has its genesis with Smith and SModcast co-host Scott Mosier making up a movie idea on a whim. As an audio clip over the closing credits shows, its a laughable lark to
them. They essentially invent a tragic Batman villain, elevated to parodic extremes. Tusk is undeniably watchable on the first viewing (especially if youre lucky enough to not know the twist), and it has plenty of positive points. (MILD SPOILERS FOLLOW.) Its original compared to the mainstream horror films around it, an effectively gruesome and
strange piece of body horror. Tusk (2014) Director: Kevin Smith Writers: Kevin Smith Writers: Kevin Smith and Scott Mosier Stars: Justin Long as free-spirited, arrogant podcaster Wallace. Long is the likable Everyguy in Jeepers Creepers but he adds a dash
of smarm in Tusk, House of Darkness and Barbarian. Michael Parks (Red State) smoothly alternates between cultured and nutso as Howard Howe, who lives in a mansion near Bifrost, Manitoba. Its aboot a two-hour drive, notes the Winnipeg gas station cashier played by Smiths daughter Harley Quinn. Tusk was shot in North Carolina, so it doesnt
achieve the snowy coldness it needs. But it doesnt go far wrong by focusing on Long and Parks. Similar to House of Darkness, its sort of awkward and sort of fascinating as the two strangers chat in this remote house. Howe spins good yarns, and Wallace (seeking stories for his podcast) is professionally engaged. But menace hangs in the air via the
firelit room and the scores bass chords. Once the twist comes, Long continues to do great work, and excellent practical effects sell the body horror. On the negative side, we remain in the shallow end of the horror pool. We wear water-wings because Tusk is also a comedy (albeit sometimes an effectively pitch-black one). Cutaways to Wallaces
girlfriend Genesis Rodriguez and bestie Haley Joel Osment are unfortunately basic. But the B-thread gains energy when an unrecognizable and uncredited Johnny Depp enters as Guy LaPointe, a quirky Quebec-based P.I. who is obsessed with catching the serial killer. One scene is a blast from a pure acting standpoint: a flashback to LaPointe
encountering Howe, who acts like a simpleton. Tusk reaches heights of dark comedy when a beautifully tragic song plays over the end credits. But theres something off about Tusk in a way Smith probably didnt intend. Its horrific, but a little too horrific. Its imagery is shocking, but the plots investigative procedure is
straightforward. Its not a pure self-indulgent lark; its as professionally made as the slick Red State. But I get the sense that Smith was laughing while making it, as he is while dreaming up the idea with Mosier on the podcast. Tusk perhaps turned out better as body horror than Smith expected when he dreamed up a goofy B-movie with Mosier. As
such, the comedy undermines the horror. Still, if Smith can make something so perversely watchable off the cuff, you cant deny his talent. Click here to visit our Horror Zone.
